

# Lemonade float (McDonald's McFloat inspiration)

## Ingrédients

- 8 scoops of ice cream or sorbet of your choice

## Préparation

1. You may have just stumbled upon the fastest recipe on the blog!
2. It is a "float," a very American dessert/drink hybrid, following in the footsteps of the more famous milkshake.
3. I had the chance to try it when I lived in Boston, but the float had completely slipped my mind until I saw a McDonald's advertisement offering one for the Paris 2024 Olympic Games.
4. Their version, the McFloat, consists of vanilla ice cream and coke; in the United States, I've often seen a vanilla & root beer version.
5. Here, I wanted to offer a lighter and fruitier version, so sorbet and lemon lemonade!
6. Put 2 scoops of ice cream in each glass; pour the beverage over, stir with a straw so the ice cream melts slightly.
7. It's ready, enjoy!
